PROFESSIONAL SUMMARY

I am a QA Engineer (Quality Assurance Engineer) with over 4 years of experience in Software Quality. I work with manual and automated testing (E2E, API, mobile, desktop, regression, integration and contract), security testing (Pentest, OWASP) and production observability. I have experience with ERP systems, legacy systems and telecommunications platforms, and I analyze business rules, requirements and system compliance. In my current role, I increased test coverage by 70%, established quality governance and strengthened CI/CD pipelines with automated test execution on every deploy. I am collaborative and focused on continuous improvement, agile methodologies (Scrum) and a quality culture (Shift-Left Testing).

TECHNICAL SKILLS

Test Automation: Cypress, Playwright, PEST PHP, TestComplete, Appium, E2E, regression testing, functional and non-functional testing

API and Contract Testing: Postman, Swagger/OpenAPI, REST API, PACT (Contract Testing), integration testing, microservices

Security and Pentest (AppSec): Burp Suite, Kali Linux, Frida, HexStrike, OWASP (Top 10), vulnerability analysis, ethical security testing, Security Testing, compliance

CI/CD and DevOps: Jenkins, continuous integration pipelines, Continuous Testing, automated test execution on every deploy, DevSecOps

Observability and Performance: Grafana, Zabbix, production environment monitoring, load and stress testing (Load/Stress Testing), metrics and alerts

Languages and Databases: TypeScript, JavaScript, Java, SQL, MySQL, PostgreSQL, SQL Server, Supabase

Test and Quality Management: Jira, Azure DevOps, test plans and test cases, acceptance criteria, Definition of Done (DoD), test coverage analysis (Test Coverage), Scrum, Agile

Business Domains: ERP, legacy systems (Delphi), telecommunications, tax/fiscal, logistics, food service, e-commerce

Cloud and AI: Cloud Computing (postgraduate specialization in progress), MultiCloud, AI applied to QA (scenario generation, coverage analysis and failure patterns)

PROFESSIONAL EXPERIENCE

QA Engineer (Senior) | UEX Tecnologia

01/2026 – Present | Curitiba, PR

- **Result:** Increased test coverage by 70% by identifying critical gaps and defining strategies aligned with quality goals.
- Technically lead the mapping and implementation of new features, from requirements and business rule analysis through validation in production.
- Implement and evolve automation suites with Cypress, Playwright and PEST PHP, covering web and back-end applications.
- Perform Contract Testing with PACT to validate contracts between microservices and ensure consistent integrations.
- Execute security testing with Burp Suite (OWASP methodology) and HexStrike, detecting vulnerabilities and critical application and infrastructure flaws.
- Verify system compliance with business rules and security requirements.
- Work on observability and monitoring of production environments, supporting early failure detection and continuous improvement.
- Reviewed and strengthened the CI/CD pipeline, ensuring automatic test execution on every deploy.
- Define acceptance criteria, DoD and per-sprint test strategies together with leadership.
- Spread a quality culture through code reviews, internal workshops and best-practice documentation.
- Use AI to support coverage analysis, test scenario generation and failure pattern identification.

Mid-level QA | Acom Sistemas
02/2025 – 12/2025 | Curitiba, PR

- Executed manual and automated tests on desktop and web systems for the food, tax/fiscal and logistics sectors (ERP).
- Automated legacy desktop applications (Delphi) with TestComplete and web platforms with Cypress.
- Validated APIs with Postman, ensuring the integrity of integrations between systems.
- Validated business rules and project logic through SQL queries in MySQL.
- Managed tests, bugs and issues in Jira and Azure DevOps.
- Created documentation to standardize software workflows.

Mid-level QA | Vivensis
05/2024 – 02/2025 | Curitiba, PR

- Executed test plans with Postman (API) and Cypress (E2E), combining manual, automated and security testing.
- Performed penetration testing (Pentest) and vulnerability analysis with Kali Linux, Burp Suite and Frida.
- Integrated security practices into the CI/CD pipeline with Jenkins (DevSecOps).
- Monitored production performance with Grafana and Zabbix (observability).
- Performed mobile testing with Appium and integrated APIs via Swagger.
- Wrote test scripts in TypeScript, JavaScript and Java.

Mid-level Systems Analyst | Nox Automação
05/2022 – 12/2023 | Curitiba, PR

- Performed manual testing with end customers to identify, reproduce and resolve bugs in an ERP system.
- Fixed client-side bugs with SQL and Stored Procedures, supporting legacy systems.
- Developed and maintained solutions with Delphi, DataSnap and C#.
- Designed and customized websites on the nopCommerce platform (e-commerce).
- Documented procedures and recorded changes (change log).

Update and Support Technician (Help Desk) | Escriba
12/2021 – 03/2022 | Curitiba, PR

- Performed updates and adjustments on client servers with SQL Server.
- Supported systems for extrajudicial notary offices, relaying State Court of Justice (TJ) changes to clients.
- Tested deliveries before updates and monitored the system after updates.

Technical Support Intern (Customer Success) | Nox Automação
08/2021 – 12/2021 | Curitiba, PR

- Tested cards and validated deliveries together with clients.
- Trained clients on new features and system updates.

EDUCATION

Postgraduate Specialization in Cloud Computing – UNAMA (2025 – 2026, in progress)
Associate Degree in Systems Analysis and Development – UniCesumar (2021 – 2024, completed)

CERTIFICATIONS

- Cypress
- MultiCloud, DevOps and AI
- Git and GitHub
- Programming Logic
